

# Weather Based Irrigation Controller Class

4-station controller  
(expandable to 22 stations)  
& weather station  
Free for attending.

## *Weather Based Irrigation Controller Classes*

*on Saturday, February 21, 2015*

*from 9 a.m. to 11 a.m. & 1:00 p.m. to 3:00 p.m.*

*at Victorville City Hall, located at 14343 Civic Drive – Conference Room D*

The Victorville Water Conservation Division in partnership with Mojave Water Agency, ( MWA ) and Alliance for Water Awareness and Conservation, ( AWAC ) is offering Victorville Water District customers an opportunity to obtain a Weather Based Irrigation Controller (WBIC ). A WBIC is a “smart” irrigation controller that is designed to help you save water by adjusting your irrigation system based on the current weather, making it more efficient.

### **How to Qualify**

- Contact the Victorville Water Conservation Division to register for a class.
- Attend a class to learn how to use the Irrigation Controller.
- Receive one free controller and weather station. \*
- Install the controller and weather station.
- Contact the Conservation Division to schedule a site visit to verify installation.
